EMAIL SETTINGS

New Posts

Set this to Smart Digest to receive a regular digest of new posts in this class. You can also choose Real Time emails, or choose to receive no email notifications.

Digest Frequency 4 Hours Posts I'm Following You can receive email notifications for post No Emails Auto-follow Posts You can automatically follow all new posts in this class. PUSH NOTIFICATIONS

New Post Notify me when a new question, note, or poll is posted.

Edit to Post Notify me when a post I follow is edited.

New Answer

Do you want to get email summaries of: Everything? Nothing? Only some posts?

How often do you want those emails?

If you're getting push notifications on your phone, you probably don't want email notifications about the same thing. If you don't like push notifications, opt into email notifications here.

In the "push notifications" sections, you can choose what types of posts/ responses should trigger your phone to 'ping' you.

Class On Wednesday

Hi! Are we having class on Wednesday?

🗀 general

An instructor thinks this is a good question

Good question | 1

Students' Answer

Instructors' Answer

John Eng +1...

2020-08-18

Edit

I will host a drop-in Zoom meeting on the first day of classes to answer any questions students may have about how the course will run.

Did you know you can write chemical equations here? They look like this: $H^+ + OH^- \to H_2O$

An instructor thinks this is a good answer

Undo thanks | 3

Followup Discussions

As you can see, there are spaces for both students and instructors to answer questions. Please help your fellow students if you can! Instructors can (and will) endorse good student answers.

The Instructors' Answer can be a collective effort. Since, John fixed Susan's typo, both names are attached to the answer.

There is also space below for Followup Discussions below the answers. This allows for followup questions, clarifications, etc.

To thank someone for their answer, just click the "Thanks" button! To indicate that you found a question helpful/interesting, just click the "Good question" button.
